

AMAN SHRESTHA

ORCHID INTERNATIONAL COLLEGE, KATHMANDU, NEPAL, amanshres007@gmail.com
www.aman007.com.np

Education

Tribhuvan University – Kathmandu, Nepal
Bachelor in Information Management

Completed: 2019-2023

Summary/Objective Statement

A Backend Developer with 2+ years of experience and specialization in crafting robust APIs, Third-Party Integrations, Database Management, Web Scraping, Automation and Optimizing Backend Systems while enhancing scalability and security, and fostering collaborative teamwork to drive innovative solutions.

Significant Coursework

Object Oriented Programming Structural Programming Web Programming Advanced Internet Working
Data Structures & Algorithm Computer Security Artificial Intelligence Computer Graphics
Software Engineering Discrete Mathematics Computer Organization Management Information System
Object Oriented Analysis and Design Digital Logic & Design Database Management System

Technical Skills

Programming: Python, Django, Django Rest Framework(DRF), JavaScript, Java, C and PHP. DBMS: PostgreSQL, MariaDB, and MySQL. Skills: Linux, Docker, Redis/RabbitMQ, Celery, GraphQL, RESTful API Design and Unit/Integration Tests. Security: OAuth2.0, Encryption/Hashing, and OTP.	Tools: Visual Studio Code, JupyterLab, Postman, Dbeaver, JIRA, GIT/GitHub, Portainer, MySQL Workbench, VirtualBox, Cisco Packet Tracer and XAMPP. Others: Web Scraping, Clouds, Nginx, Scripting, HTML/CSS/Bootstrap, etc

Work Experience

Backend Developer (Freelancing), Varicocele Healing, Ottawa, Canada [\(Link\)](#) (Sep 2024 – Jan 2025)

- Contributed to the development of an AI-powered healthcare application and its integrated e-commerce platform.
- Designed and implemented APIs using Django Rest Framework (DRF) to enable secure and efficient communication between frontend and backend systems.
- Set up automated periodic backup systems to ensure secure data storage and support disaster recovery strategies.
- Integrated payment gateways like PayPal and Stripe, and implemented other third-party API integrations for enhanced platform functionality.
- Leveraged Celery with Redis to handle background task processing for time-sensitive operations, ensuring scalability.
- Built data analytics pipelines and integrated Umami for user activity tracking and performance monitoring.
- Worked on the e-commerce module using Saleor, optimizing product listings, transactions, and inventory management.
- Automated infrastructure setup and deployment using Docker and Linux shell scripts, improving developer efficiency and scalability.
- Configured and managed email services using Zimbra to streamline communication workflows.

Associate Software Engineer, Khalti, Bakhundole, Lalitpur [\(Link\)](#) (Sep 2023- Sep 2024)

- Developed Robust APIs Adhering to Industry Best Practices, enhancing system scalability and reliability.
- Worked on critical services responsible for more than 60% of the product at Khalti Digital Wallet.
- Worked with various clients where our platform acted as a Central Banking System for them.

- Integrated various third-party services such as Remittance Services, Cooperatives, Nepse TMS, etc.
- Delivered Comprehensive Documentation and Test Cases.
- Ensured reliability, security, and performance of backend systems through efficient coding practices, optimization, and monitoring.
- Ability to work effectively within a team and across functions, fostering clear communication and teamwork.
- Applied a problem-solving mindset to tackle complex challenges, optimizing system performance and contributing to the development of innovative fintech solutions.

Python Developer Intern, Khalti, Bakhundole, Lalitpur
[\(Link\)](#)

(May 2023- Sep 2023)

- Built and contributed to two products from the ground up, gaining valuable exposure to both development and business operations.
- Developed a solid understanding of how technology integrates into business workflows and how companies benefit from scalable, user-focused solutions.
- Gained insight into the startup environment and learned how to manage project timelines, deliverables, and communication within a collaborative team.

<u>Freelancing and Projects</u>	2022-2024 (Time Period)
Pulseee Pty ltd – Freelancing (link) • Worked on their network monitoring SaaS which offered keyword monitoring, ping monitoring, port surveillance, ssl, domains, etc. Technologies: Python, Django, Django Rest Framework, Linux, Redis, Celery, Flower, Beautiful Soup, Selenium, and Cloud.	2024
QR/Bar Code Based Data Printing Software – Full Stack Web Development (link) • Developed QR/Bar Code based data printing SaaS for various layouts of Oddy Label sheets. Technologies: Python, Django, JavaScript, Postgres, AJAX, Bootstap/TailwindCSS, and Khalti Payment Gateway.	2023
AgriTech – Full Stack Web Development • Assisted in crowdfunding web app for the Agro-Industry, serving as a platform for farmers and investors to collaborate. Technologies: Python, Django, Postgres,, Google API, JavaScript, Google Location APIs, AJAX, Bootstap/TailwindCSS and Khalti Payment Gateway.	2023
Veterinary Ecommerce – Full Stack Web Development • Developed an e-commerce project for a veterinary shop. Technologies: Python, Django, JavaScript, Postgres, AJAX, Bootstrap, Payment Gateway, and Google Location APIs.	2022
