

AMAN SHRESTHA

Backend & System Developer

Kathmandu, Nepal | amanshres007@gmail.com | +977-9804994462

aman007.com.np

Professional Summary

Backend Developer with 3 years building scalable, reliable systems for high throughput products. Strong in distributed architecture, API design, data pipelines and cloud infrastructure. Experienced across fintech, ecommerce and large scale industrial data platforms, with a focus on cost-efficient, maintainable design.

Technical Skills

Language & Frameworks: Python, JavaScript, Django/DRF, FastAPI, FLASK, React Data & Messaging: PostgreSQL, MongoDB, Redis, MariaDB, Celery, OpenSearch, S3 Vectors Cloud & DevOps: Linux, Docker, AWS, Nginx, Bash	APIs & Security: REST, GraphQL, SOAP, GRPC, SSE, Web Sockets, Third-Party Integrations, OAuth2.0, Encryption/Hashing, OTP Practice & Tools: System Design, Unit/Integration Testing, CI/CD, Git, JIRA, Postman, AI/LLMs/RAG
---	--

Work Experience

(May 2023 – Present)

Backend Developer, Autolab Technologies (Misumi Outsourcing)

Onsite | (Dec 2025 – Present)

- Worked on the Nepal Data Factory, a recommendation engine powered by millions of parts-data combinations, using OpenSearch, S3 Vectors, and PostgreSQL orchestrated through Celery pipelines to surface relevant parts across a massive combinatorial catalog.
- Contributed to PLX, a highly complex serverless-first system on AWS with a cost-efficient, pay-per-use design leveraging ECS/Fargate and Lambda to scale to zero and eliminate idle infrastructure cost.
- Developed production-grade ETL pipelines ingesting large-scale Excel/CSV files (1M+ rows) from S3 into PostgreSQL and MongoDB, with idempotency guards, Redis-based distributed locking, and streaming optimizations for memory and throughput.
- Reverse-engineered Japanese-language requirements to map the legacy PLG API onto new specifications, producing full API contracts and schema rationale; resolved non-deterministic AI output (fabricated values, phantom parts) in the parts-analysis pipeline.
- Deployed Celery-based distributed task pipelines on ECS/Fargate with SQS and ElastiCache Redis, implementing Canvas workflows (chains, groups, chords) with correct acks-late and visibility-timeout configuration.

Associate Software Engineer, IME Khalti Digital Wallet ([Link](#))

Onsite | (Sep 2023- Aug 2024)

- Worked on critical services responsible for more than 60% of the product at Khalti Digital Wallet.
- Integrated major third-party services such as Remittance Services, Cooperatives, Nepse TMS, etc.
- Delivered robust, well-documented APIs meeting fintech standards for reliability, security and scalability, collaborating across cross-functional teams.
- Applied a problem-solving mindset to address complex technical challenges, optimize system performance, and contribute to the development of innovative fintech features.

Freelance Full Stack Developer

Remote | (Aug 2024 – Present)

Key Freelancing Projects

AI Healthcare Platform ([Link](#))

- Built a production-grade REST API with Celery/Redis async processing, Dockerized deployment with automated backups and integrations(Umami, Zimbra, Saleor)

Multi-Tenant Institute Platform ([link](#))

- Architected a SaaS multi-tenant system (subdomain-per-institution) with enterprise-level role based access control and a analytics dashboard.

Job Board Platform (Saudi Market)

- Engineered a job marketplace with employer/employee onboarding, approval workflows, chatrooms, and hiring pipelines with secure authentication and scalable architecture in mind.

QR/Barcode Label SaaS ([link](#))

- QR/barcode label sheets, eliminating manual Excel/CSV label creation for SME retail and logistics.

Pulseeee.io — Django Specialist (Consultant) ([link](#))

- Conducted architecture and performance review for a startup running multiple Django-based microservices handling website, keyword, port, ssl monitoring, etc
- Provided feedback on microservice communication strategies and shared database design for improved observability and scaling.

Veterinary E-Commerce Platform — Full Stack Developer ([link](#))

- Developed an e-commerce project for a veterinary shop where various pet shops item could be listed and users can purchase them with google location delivery.

Education

Tribhuvan University – Kathmandu, Nepal
Bachelor in Information Management (3.65 CGPA)

Completed: 2019-2023

CERTIFICATIONS

Programming Essentials in Python, Python Institute ([verify](#))

Introduction to Cyber Security ([verify](#))
