Education

Tribhuvan University – Kathmandu, Nepal
Bachelor in Information Management (3.64 CGPA)

Completed: 2019-2023

Summary/Objective Statement

A Backend Developer with two plus years of experience and specialization in crafting robust APIs, Third-Party Integrations, Database Management, Web Scraping, Automation and Optimizing Backend Systems while enhancing scalability and security, and fostering collaborative teamwork to drive innovative solutions.

Technical Skills

Programming: Python, Django, FastAPI, Django Rest Framework(DRF), JavaScript, Java, C and PHP. Database: PostgreSQL, MariaDB, MySQL and MongoDB. Skills: Linux, Docker, Redis/RabbitMQ, Celery, GraphQL, RESTful API Design and Unit/Integration Tests. Security: OAuth2.0, Encryption/Hashing, and OTP.	Tools: Visual Studio Code, JupyterLab, Postman, Dbeaver, JIRA, GIT/GitHub, Portainer, MySQL Workbench, VirtualBox, Cisco Packet Tracer and XAMPP. Others: Web Scraping, AWS, Nginx, Bash Scripting, React, HTML/CSS/Bootstrap/Tailwind, AI/LLMs, RAG/MCP, etc.
---	---

Work Experience

Independent Projects / Freelance Software Engineer

(Jan 2025 – Present)

- Collaborated with clients globally on a range of software challenges and technical consultations.
- Maintained, refactored, and optimized codebases for improved performance, scalability, and maintainability.
- Designed and developed personal projects to explore new technologies and expand technical capabilities.
- Focused on skill development in DevOps, AI/LLMs, and Frontend engineering, while staying current with emerging industry trends.

Backend Developer (Freelancing), Varicocele Healing, Ottawa, Canada ([Link](#))

(Aug 2024 – Jan 2025)

- Designed and implemented APIs using Django Rest Framework (DRF) to enable secure and efficient communication between frontend and backend systems.
- Integrated payment gateways like PayPal and Stripe, and implemented other third-party API integrations for enhanced platform functionality.
- Set up automated periodic backup systems to ensure secure data storage and support disaster recovery strategies.
- Designed data analytics endpoints using four different data sources for user activity tracking and performance monitoring.
- Automated infrastructure setup and deployment using Docker and Linux shell scripts, improving developer efficiency and scalability.
- Worked on their various integrated services such as Umami, Zimbra, and Saleor.
- Leveraged Celery with Redis to handle background task processing.

Associate Software Engineer, Khalti, Bakhundole, Lalitpur ([Link](#))

(Sep 2023- Aug 2024)

- Developed Robust APIs Adhering to Industry Best Practices, enhancing system scalability and reliability.
- Worked on critical services responsible for more than 60% of the product at Khalti Digital Wallet.
- Worked with various clients where our platform acted as a Central Banking System for them.
- Integrated various third-party services such as Remittance Services, Cooperatives, Nepse TMS, etc.
- Delivered Comprehensive Documentation and Test Cases.
- Ensured reliability, security, and performance of backend systems through efficient coding practices, optimization, and monitoring.
- Ability to work effectively within a team and across functions, fostering clear communication and teamwork.

- Applied a problem-solving mindset to tackle complex challenges, optimizing system performance and contributing to the development of innovative fintech solutions.

Python Developer Intern, Khalti, Bakhundole, Lalitpur ([Link](#))

(May 2023- Sep 2023)

- Built and contributed to two products from the ground up, gaining valuable exposure to both development and business operations.
- Developed a solid understanding of how technology integrates into business workflows and how companies benefit from scalable, user-focused solutions.
- Gained insight into the startup environment and learned how to manage project timelines, deliverables, and communication within a collaborative team.

Freelancing and Projects

Pulseee Pty Ltd – Freelancing ([link](#))

- Worked on their network monitoring SaaS which offered keyword monitoring, ping monitoring, port surveillance, ssl, domains, etc.

Technologies: Python, Django, Django Rest Framework, Linux, Redis, Celery, Flower, Beautiful Soup, Selenium, and Cloud.

QR/Bar Code Based Data Printing Software – Full Stack Web Development ([link](#))

- Developed QR/Bar Code based data printing SaaS for various layouts of Oddy Label sheets.

Technologies: Python, Django, JavaScript, Postgres, AWS, Nginx, Docker, Bootstrap/TailwindCSS, and Khalti Payment Gateway.

AgriTech – Full Stack Web Development

- Assisted in crowdfunding web app for the Agro-Industry, serving as a platform for farmers and investors to collaborate.

Technologies: Python, Django, Postgres,, Google API, JavaScript, AWS, Google APIs, Tailwind CSS and Khalti Payment Gateway.

Veterinary Ecommerce – Full Stack Web Development ([link](#))

- Developed an e-commerce project for a veterinary shop.

Technologies: Python, Django, JavaScript, Postgres, HTML/CSS/Bootstraps, Payment Gateways, and Google APIs.

CERTIFICATIONS

Programming Essentials in Python, Python Institute ([verify](#))

Introduction to Cyber Security ([verify](#))
